The Doctrine of Porphyry-Antiochus teaches that from all these candidates (in the case of Hitler- all planets except Sun and Mars) we must find out the candidate-planet who BEST epitomises (sums up) the whole Nativity. I will give the original and the translation of this extremely important passage of Porphyry:

(τον συμπαθεστατα προσ την γενεσιν κειμενον αποφαινονται κυριον)-

"(the planet) who is the best embodiment of the (whole) Nativity, reveals himself as the Ruler"   (the Almuten, the Ego).

For this task is the second register of the panel which is given above. It takes the words of Porphyry and puts them into code.

Initial stage: the column on the left shows the points gathered by the planets.

Stage 1: The invisible planets (combust,under the Sun's beams) are disqualified. (We can order the wizard not to disqualify them)

Stage 2: The cadent planets (in houses 12, 6, 3, 9) are disqualified. (We can order the wizard not to disqualify them)

Stage 3: The disqualified planets have zero points and we see what is left as planet-candidates.

Stage 4: Here the wizard looks who from the candidates is close enough to the champion in points. We control this by the text-box where we input the points difference from the points of the champion as a percentage of his points. In our case Saturn is the champ with 6 points and the wizard is ordered to consider all planets within 25 % of the champion-planet. 25% of 6 is 6/4 = 1.5 points. This means that the wizard will take all planets with points 4.5 or higher and consider all of them. To all these planets the wizard gives the points of the champion id est 6 and then looks at their strengths which are as follows:

Stage 5 Orientality; Stage 6 Own Dignities; Stage 7 Level of Hays; Stage 8 Power of House-Position; Stage 9 Aspects to ASC, Sun and Moon;

In Stage 10 the so gathered points of all almuten candidates are given.

Then in the last Stage, 11, the King of the Nativity, the Ruler, the Ego who commands is proclaimed and crowned.

Here again we can change the criteria of the wizard by changing:

1 the points assigned for rulership (in the upper register of the panel)

♃   7 ☾ ☽
bnds   sign
points [1] [2]

2 the number of days before and after the Birth in which to look for planets
in a Heliacal Phase (in the upper register of the panel)

Heliacal Phases within
[7] days before BIRTH
[0] days after BIRTH

3 the values assigned for the various strengths of the planets in the lower registe
stages 5 to 9. The points given are fixed but we can multiply them
by a factor of our choice.

| 0 | ♄ | 1 | 3 |
| [1] | Multiply by: | [1] | [1] |

4 the extinction of the atmosphere (very important for calculation of the heliacal phases. 0.16 is very clear atmosphere, 0.40 is the opposite). There is a textbox to input the extinction.

5 the house-system.

[[1]] Extinction [0.24] House System [Whole-Sign ▾]

6 in the end, with the 'levers' of the Wizard, we can additionally refine the search for the 'King'
There we can disqualify planets under the beams of the Sun (invisible) and cadents OR not disqualify them.
We can also set the limit for the points that the planets MUST gather in order to continue
(as a percentage of the maximum points gathered by the planet champion as we explained earlier)
In this way we have one extremely sophisticated, flexible and intelligent Wizard on our side.
